

LEDLIGHT THERAPY

ANTI AGEING, FINE LINES & WRINKLES

The red LED Light Therapy combats the signs of ageing by delivering energy at a cellular level to increase the production of collagen which is responsible for skin firmness and elasticity.

ACNE

The blue LED Light Treatment destroys p-acne bacteria that accumulates in the pores and causes your skin to become inflamed leading to acne lesions and blemishes. The Miracle Mask blue LED light kills the light sensitive acne bacteria below and above the surface of the skin and minimises redness and irritation.

EVENS SKIN TONE

The green LED Light inhibits the production of excess melanin at a dermal level, preventing it from travelling to the skins surface. It also breaks up existing melanin clusters to diminish age spots, and pigmentation, thus evening skin tone for a more youthful appearance.

CELL REGENERATION, TREATS ROSACEA & INFLAMMATION

The purple light reduces the telomeres of DNA in the cell which regenerates the cell and alleviates inflammation. It is an effective treatment for Rosacea and can also treat sunburn.

PROMOTES HEALING, TREATS SWOLLEN CAPILLARIES

The cyan LED light treatment promotes healing, and is excellent used in conjunction with other treatments to speed up the healing process. The cyan light has a soothing & calming effect that also assists with reducing the size of swollen capillaries.

STIMULATES RED BLOOD CELLS & CIRCULATION

The yellow LED light stimulates red blood cells and activates toxin elimination, improves lymphatic function and circulation, helping to eliminate toxins. triggers lymphocyte production. The Yellow light is also effective in treating pigmentation issues.

REVITALISING, IMPROVES DULL COMPLEXIONS

The orange LED light treatment works to eliminate toxins improving dull complexions, revitalising your skin and leaving you with a healthy radiant glow. Perfect for special occasions.

DEEP PENETRATING CELL RENEWAL

The infrared LED light therapy is a breakthrough treatment with the same benefits as the red LED light treatment but penetrating the cell to a deeper level for an enhanced improvement in collagen and skin elastin and faster results
